FOR IMMEDIATE RELEASE**ICP DAS USA, Inc. Introduces Modbus TCP 2 Loops Single-phase Power Meter**

ICP DAS USA, Inc. introduces [PM-3112-MTCP](#), an advanced, powerful, and cost-effective Smart Power Meter that gives you access to real-time electric usage for single-phase power measurement. With its high accuracy (<1%, PF=1), the PM-3112-MTCP can be applied to both low voltage primary side and/or medium/high voltage secondary side and enables you to obtain reliable and accurate energy consumption readings from your monitored equipment in real time during operation.

[PM-3112-MTCP](#) supports Modbus TCP protocols for easy integration into new or existing SCADA systems. These compact and cost-effective power meters are equipped with revolutionary wired clip-on CT (various types, support input current up to 200 A). They operate over a wide input voltage range between 10 ~ 300 VAC which allows worldwide compatibility. With 2 relay outputs, it can also be linked with sirens or lights for alarm indicators.

[ICP DAS USA](#) is a cost-effective leader in the U.S. industrial market; offering a stunningly competitive price/performance ratio, while catering to the latest solutions for current industrial trends. We seek to provide our customers with cost-effective, flexible, and easy-to-use solutions for their Data Acquisition and Embedded Control Applications. [ICP DAS USA](#) provides a great variety of products with modular and universal solutions for any scale application or projects.

To learn more about the variety of ideas and real projects integrated with ICP DAS hardware, visit our website at www.icpdas-usa.com, or give us a call, toll free, at 1-888-971-9888 and one of our engineers would be happy to assist in reviewing the project requirements, ensuring that the highest quality solution is presented in your final application.
