ICP DAS USA introduces new Touchpad Touch Screen HMI Controller to its already popular TPD series.

ICP DAS USA's new TPD-433-M2 is a 4.3 inch touch screen HMI device. The TPD-433-M2 is equipped with 1 RS-232 (3-pin) port, 1 RS-485 port, Power over Ethernet (PoE), real time clock (RTC) and stylish panel. The TPD-433-M2 can also expand its memory to 16 MB SDRAM and 16 MB Flash. .

TPD-433-M2 series of touch HMI integrates seamlessly with many kinds of I/O modules; presenting a beautiful, flexible and user-defined picture frame. The TPD-433-M2 makes it perfect for project applications such as: building, factory and home automation. With its low cost and powerful system, the TPD series is an easy way to upgrade mechanical switches into intelligent control pads.

TPD-433-M2

Features:

- Excellent C/P ratio (cost/performance)
- High-resolution color touch screen
- PoE (Power Over Ethernet)
- RTC (Real Time Clock)
- Modbus TCP/RTU, DCON protocol
- All TPD series modules come with software development tool

To learn more about the variety of ideas and real projects integrated with ICP DAS hardware, visit our website at <http://www.icpdas-usa.com>, or give us a call, toll free, at 1-888-971-9888 and one of our engineers would be happy to assist in reviewing the project requirements, ensuring that the highest quality solution is presented in your final application
