CAGE/NCAGE Code: 3FNFO

Multi-circuit Power Monitoring Display

**10.4" TFT LCD
PMD-4201**

**7" TFT LCD
PMD-2201**

PMD-2201/4201
Industrial IoT Power Meter Concentrator with Touch Panel

The PMD (Power Monitoring Display) makes it easy to monitor multi-circuit power systems in building and manufacturing plants. The PMD can read Power Meter data and display the data in a convenient central panel for easy monitoring. The PMD can display data read from multiple Power Meters using Modbus TCP or Modbus RTU.

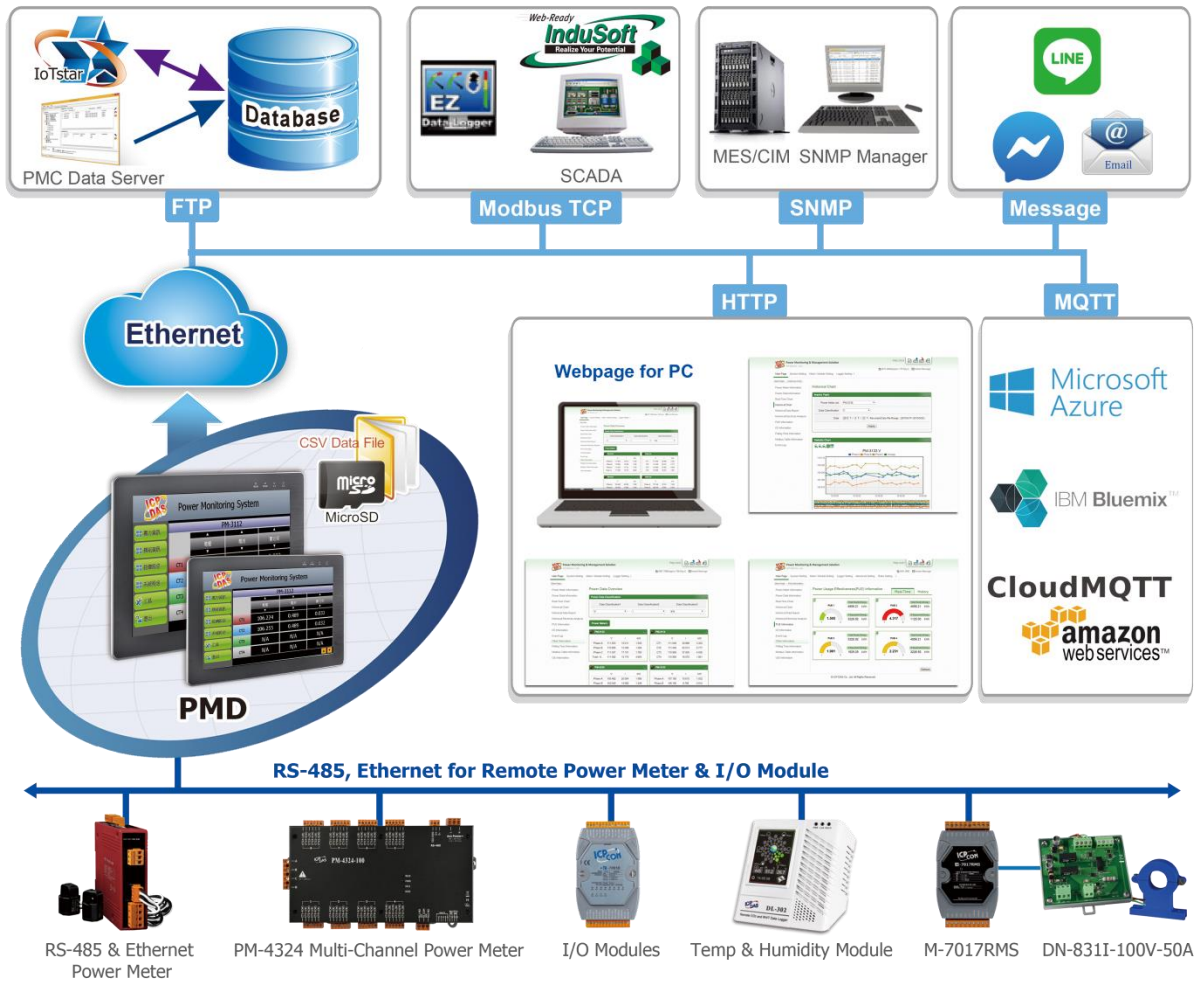

Making Data Acquisition Easy

CAGE/NCAGE Code: 3FNFO

Using our 4 of our PM-4324 (24 circuit power meters) connected to PMD, you can display up to 96 CT's of data. The PMD can also share data frm these 96 CT's via Web page, FTP, Modbus TCP, MQTT or SNMP.

The PMD series offers an easy to use and cost effective option for displaying and monitoring power consumption in office buildings, apartment buildings and manufacturing equipment.
