ICP DAS USA Releases New TouchPad VPD H-Series

ICP DAS USA's TouchPad VPD H-series is an industrial touch HMI device. It is designed with 3.5" high resolution color touch screen LCD for easy read and navigation. The VPD H-series is equipped with built-in RS-232/RS-485 communication ports, giving users the ability to control, monitor I/O at the remote sides. The TouchPad VPD H-series is also equipped with built-in non-volatile storage, making the VPDH-series more reliable for rugged and harsh environments. It can also be used in applications in building and home automation.

HMIWorks comes with all VPD H-series devices. HMIworks is development software created for the VPD series. The software offers powerful and intuitive programming with graphic capabilities. It is also user-friendly, allowing users to create appealing graphical interface screens in minutes.

For PLC users, HMIWorks provides Ladder Designer and C language environment for IT users. Users are able to create an application program when using Ladder Designer in less than 30 minutes.

To learn more about the variety of ideas and real projects integrated with ICP DAS hardware, visit our website at <http://www.icpdas-usa.com>, or give us a call, toll free, at 1-888-971-9888 and one of our engineers would be happy to assist in reviewing the project requirements, ensuring that the highest quality solution is presented in your final application.
