**FOR IMMEDIATE RELEASE****ICP DAS USA, Inc. Introduces KingView SCADA Software**

Harbor City, CA—October 10, 2011 – [KingView](#) is a Windows based PC software that allows you to build data information systems for monitoring and control. You can trigger outputs and events based on input data and can create graphic simulation of system processes. [KingView](#) is being used in many applications like power systems, wastewater management, building automation, coal mine systems, and environmental protection projects. [KingView](#) has an optional web publishing capability which means you can access your control system securely from any place at any time. [KingView](#) comes with one hour of free training which helps you get started quickly and easily.

[ICP DAS USA](#) is a cost effective leader in the US industrial market. They provide flexible, easy to use solutions that provide a competitive price to performance ratio and cater to the latest industrial trends. We provide a variety of products with modular solutions for any scale application or project.

[KingView](#) comes in many tag configurations like 64, 128, 256, 512, 1024 and unlimited. Full Editions include development and runtime licenses. Separate runtime and development editions are also available and are ideal if you are making machines. [Kingview](#) supports hardware and software encryption. We have a large tutorial section on our website with tutorial videos and PDF documents which explain how to create projects, make graphics, connect with PLC's and I/O and much more. Technical support is provided from our office in Southern California.
